**Thewlis, R.M., Timmins, R.J., Evans, T.D. & Duckworth, J.W.** (1998): The conservation status of birds in Laos: A review of key species. Nuthatch *Sitta formosa*, Black-hooded Laughingthrush *Garrulax milleti*, Grey Laughingthrush *G. maesi*, White-cheeked Laughingthrush *G. vassali*, Red-tailed Laughingthrush *G. milnei*, Sooty Babbler, Grey-faced Tit-babbler *Macronous kelleyi*, Spectacled Fulvetta *Alcippe ruficapilla*, Rufous-throated Fulvetta *A. rufogularis*, Mountain Fulvetta *A. peracensis* and Short-tailed Parrotbill *Paradoxornis davidianus*. These are species either on the brink of global extinction; Globally threatened or Near-Threatened but occurring commonly at many sites in Laos; for which recent Lao records are more substantial than those from anywhere else in a species's range; or have limited geographical range of which Laos is a substantial part. A revised set of key species for future use in Laos is given in Appendix 2. *Bird Conservation International* 8 (SUPPL.): 1-159. [Abstract](#)
